## **DETAILED ACTION**

## Acknowledgment

1. This Office Action is responsive to the Amendment filed on 10/05/2007.

## Allowable Subject Matter

- 2. Claims 1 and 3-112 are allowed over prior art of record.
- 3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggests the arrangement of the module bridge system and especially, the system further including an adhesive layers applied to the printed contact layers for adhesively attaching individual module bridges to the carriers in the region of the connection element of the antenna elements as recited in claim 1 and further limitations of its dependent claims 3-12.

The previously cited reference Plettner (US 2003/0140487) teaches method for producing a carrier tape with a plurality of electrical units, whereby the carrier tape is intended for manufacture of transponders. See the abstract and figures 1-4b. The previously cited reference Brugger et al. (US 2005/0181530) teaches method of manufacturing a transponder that including a transponder IC; two planar communication elements that are attached to a carrier element; wherein the transponder IC comprising two IC contacts. See figures 1-5 and the abstract. However, both Plettner and Brugger et al. fail to teach or suggest an adhesive layers applied to the printed contact layers for

adhesively attaching individual module bridges to the carriers in the region of the connection element of the antenna elements as now amended in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
